

## Open Exeter Officer REPORT

### Term 1 2017 (November & December)

#### What I've done

Collaborated with Education Officer and the Widening Participation Officer on engagement. Feedback from statistically least engaged groups within campus (Postgrads, business and CSM) required focus group and I plan to feedback these queries to a smaller team with Exeter Undergrad and Postgrad officers in weekly meetings to dedicate time to this.

Compiled my own short survey on student communication and findings highlight low levels where students regularly check emails and FXU Facebook page. Students showed a higher desire for things to be projected on the multiple TV's around campus communal areas where posters could be put up.

#### What I'm doing

Planning on exploring the creation of an online student forum similar to the Student Room in partnership with the WSP officer to help students have a platform where they can help themselves. This has the potential to ease the burden of presidents and lecturers if students can have a place to have dialogue between themselves to discuss any academic or personal queries. This will also help to alleviate the issue surrounding communication as many students are not aware of events and projects on campus.

Working to introducing a way of the campus utilising its TV's a lot more to advertise events and projects that are imminent and/or important for the student body.
